

quickclick walls

product information sheet

AFI's QuickClick Walls are the answer for making an impressive visual impact using a large custom graphic print, the interest of a curved shape and the simplest of frame assembly. No tools needed – just listen for the click!

The genius of the QuickClick Wall is in the simplicity of the frame system because it requires no tools! Think tent poles that only require lining up and a gentle push to click them conveniently into place.

The wide format custom graphic print is vibrant and long lasting due to the high quality digital printers that utilise air lock technology to embed the ink into the fibres of the fabric to ensure a print that is bright and bold. Finished with a zippered seam along the bottom, the graphic works like a sock to fit easily over the frame.

The QuickClick Wall is supplied to you in a convenient carry bag that houses all the frame components, graphic, quick release pins and the stylish flat surface feet.

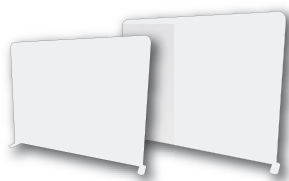

key features

- Lightweight
- Option for single or double sided graphic
- Numbered tubes with quick release buttons
- Choose from flat, vertical or horizontal curve shapes
- Convenient carry bag for all components (with separate carry bag for flat feet)
